

# NIMS Implementation

## Tips of the Week

### NIMSCAST Account Migration

If an account was established within the Public hierarchy (created outside the official permission base) of the NIMSCAST, it is possible to move all assessment information under the appropriate state or territory account. In order to do so, the user of the Public account must be listed as an Admin user on an account under the state or territory. A user may migrate an account by following these steps:

- Log into the NIMSCAST
- Verify that the Public account is listed after “Switch Account” (located to the upper right of the Navigation menu). The user will see the word public in the account location string.
  - If the word public is not listed, click on “Switch Account”.
  - Click on the account name listed under the word “Public”.
- Click on Migrate My Account, located in the Navigation menu.
- Click on the account name in the “Switch Account” list that information will be migrated to.
- Confirm migration by clicking Ok in pop up box.
